Setting up your TV and Wireless Speakers

Before making any connections, please familiarize yourself with your new wireless speaker system. The set consists of two satellite speakers, labeled left (white color connector) and right (red color connector), and a subwoofer. On the back of the subwoofer, you will see a three-prong power connector (labeled AC IN), two plug-in sockets (labeled SPEAKER), and a small button (labeled CH-SEARCH/PAIRING).

The AC IN is where the power cord will be connected to supply power to the set. The two colored sockets match up with the connectors for the left (white) and right (red) speakers. The small channel search/pairing button is used if re-pairing is required.

The diagram below shows a typical setup of the wireless speaker system in relation to the TV.

PAIRING PROCEDURE:

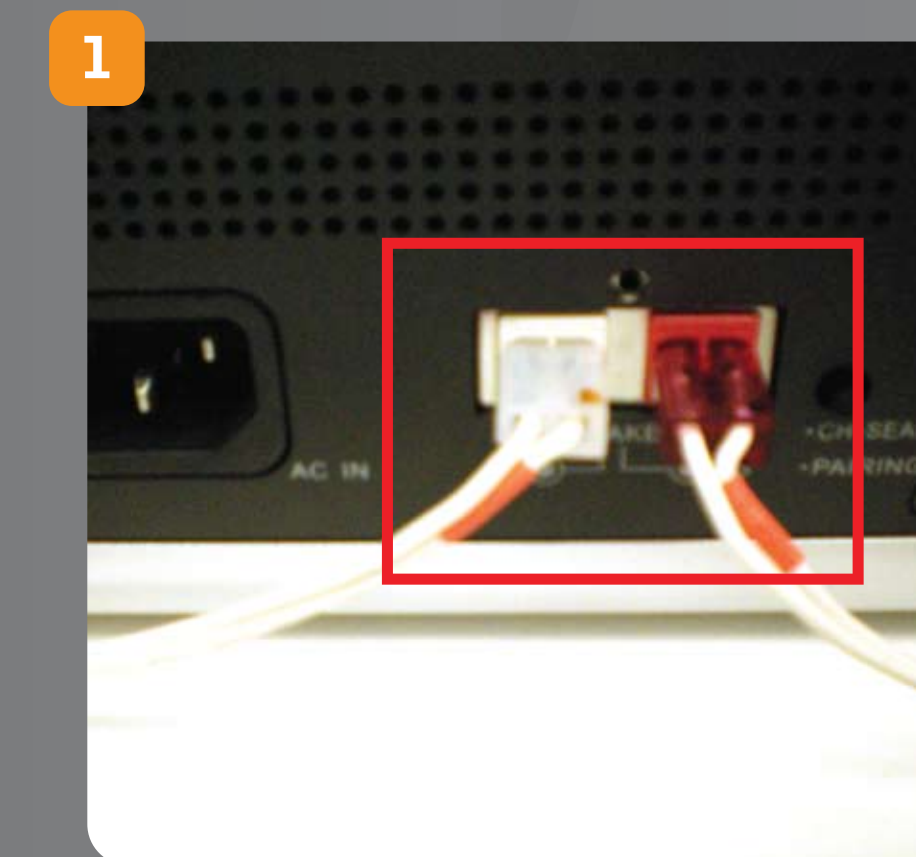

Your wireless speaker system has already been paired (this means they are set to communicate to each other). To set up the wireless speaker system and your TV, follow the instructions below.

1. Turn the TV off.
2. Connect the left and right speakers to the subwoofer matching the red and white connectors to their matching sockets. (See FIG. 1)
3. Plug the power cord into the subwoofer. An LED on the front of the subwoofer will start flashing. This indicates that the wireless speaker system is ready to be paired to the TV. (See FIG. 2)
4. Remove the transmitter card (Tx) from its package.
5. Insert the Tx card into the slot on the left-hand side of the TV (as you face the display), and make sure the gold plated connectors at the end of the Tx card face towards the front of the TV.
6. Turn the TV on.
7. The flashing LED will become a solid light, indicating that pairing has taken place.
8. To verify your TV and wireless speakers are ready, press MENU to bring up the On Screen Display menu and select Audio Mode. Scroll down to Wireless Speaker and select "ON", or press the 5.1 hot key on the remote control.
9. Now, enjoy Dolby 5.1 surround sound (if provided with the programming) or simulated stereo surround sound.

If re-pairing of the Wireless Speaker System is required

Note: The following steps are required ONLY if the Wireless Speaker System and the TV did not pair (locate each other) correctly after following the instructions.

1. Turn the TV off.
2. On the transmitter card (Tx) find the sliding switch near the gold-plated connectors. There are two positions (ID and PLAY). Slide the switch to the ID position. (See Fig. 1)
3. Insert the card into the TV slot.
4. Plug the AC power cord into the subwoofer. (See Fig. 2) The subwoofer LED will flash.
5. Turn the TV on.
6. Press and hold down the Channel Search (CH-SEARCH) button on the back of the subwoofer for approximately 5 seconds. A long beep will sound. (See Fig. 3)
7. The LED will stop flashing and change to a solid light.
8. To complete pairing, turn the TV off, remove the TX card from the slot and slide to the Play position, then re-insert it into the TV slot. Turn on the TV and enjoy the new surround sound.
